DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 7, 8 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lecoq, of record. Applicant's invention is directed to an article of manufacture and would be met by any teaching of a compound that meets the parameters of claim 1. Lecoq discloses the formation of the basic compound of LuYAlO_3 in his claim 25 recitation. Thus it appears that this compound, per se, is known in the art. As stated in the previous action, forming this compound on a LSO layer with electrodes is also within the scope of this reference which would allow for some obvious optimization of the basic parameters.

Allowable Subject Matter

Claims 2-6, 9 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
